MKS | SKS

Building Connections

OBO
BETTERMANN

Robust, tested, practical: 45 years of MKS and SKS cable tray systems

The MKS and SKS cable tray systems from OBO Bettermann have a long tradition. For 45 years, the robust systems, which have been tested for various areas of application, have been successfully employed by planners and specialists in the field of electrical installations.

The systems have proved their worth in indoor and outdoor areas, both in industrial environments and in public buildings, on ships just as much as in tunnels, or in the construction of power stations and mines. The fire protection-tested routing systems according to DIN 4102 are also used for fireproof installations in escape and rescue routes.

The different versions of the medium-duty and heavy-duty cable trays are intrinsically closed systems, comprising all the necessary fittings and accessories. Using cable trays in the recognised OBO quality means that all the requirements for electrical installations on the construction site can be mastered professionally and safely.

Maximum load capacity and versatility

Add-on tee, type RAA
Installed horizontally

Tee

Add-on tee, type RAA
Installed vertically

90° bend and 45° bend
Type RB 90 and type RB 45

Adjustable bend element type RGBEV

Floor end plate, type BEB, and ad-
justable connector, type RGV

Cable tray systems MKS and SKS

Commitment to quality

- Tested quality (amongst other things, UL, VDE, EMC)
- Robust: Carrying capacity (load capacity) according to DIN EN 61537 tested and confirmed in the OBO BET Test Centre
- Can be used in false ceiling areas of escape and rescue routes: Proven mechanical stability of 30 minutes in cases of fire

Medium-duty and heavy-duty cable tray system

- Material thickness 1.0 mm or 1.5 mm depending on version
- Various system heights and widths
- Also available as an unperforated version
- Wall and ceiling mounting with threaded rods, suspended supports, wall and support brackets
- The heavy-duty cable tray can be used as a standard support structure for the electrical functionality maintenance classes E60 to E90

Applications:

FS Strip galvanised

- Indoor use
- Dry room atmosphere
- Without any impact from aggressive pollutants

FT Hot-dip galvanised

- Exterior areas
- Power station construction
- Systems and machine construction
- Oil and gas industry
- Mining

A2 **A4** Stainless steel

- Tunnel construction
- Food industry
- Chemicals and pharmaceuticals industry
- LPG (liquid petroleum gas) applications
